SUMMARY

Technology Leader and Software Architect with over 20 years of experience leading IT strategy, Corporate infrastructure and implementation of critical ERP/CRM platforms. Migration specialist. Massive data management, microservices architecture, and complex API integrations. Proven track record. in infrastructure cost optimization (Cloud/On-Premise), information security governance (ISO 27001, ITIL, DRP, BCP) and management of multidisciplinary teams under agile methodologies (Scrum).

- TECHNICAL SKILLS**
- Architecture & Governance: Solution Architecture, Microservices, REST API Integration, Agile Methodologies (Scrum), Regulatory Compliance (ISO 27001, GDPR, HIPAA).
Databases: PostgreSQL, MS SQL Server, Oracle 11g, MySQL, ClickHouse, MongoDB, MariaDB, DBeaver.
 - Cloud & DevOps: GCP, Docker, Kubernetes, Git, Linux (Red Hat/Ubuntu).
 - Platforms and ERP/CRM: SAP, Microsoft Dynamics 365, Salesforce, ASPEL SAE, COI, NOI.
 - BI & Telemetry: Power BI, Grafana, Real-Time Dashboards, Crystal Reports, Jasper Reports, Tableau.
 - Languages & Development: JavaScript, Java, Angular, .NET, Python.
 - Specialties / Core Stack: Python, Azure, AWS, Odoo.

- PROFESSIONAL EXPERIENCE**
- Himex Customs Agency Implementation Manager / Software Architect Mexico City, Mexico | May/2024 – June/2026
- Led the engineering and strategic deployment of the Odoo ERP, automating the entire operational workflow and Eliminating critical manual processes at the agency and completing 100% of what was planned for the implementation of the project for the customs agency and significant improvements for the operation.
 - Designed and implemented distributed database architectures (PostgreSQL, SQL Server, Oracle, MySQL) in High Availability (HA), restructuring licenses and reducing implementation costs by 80%.
 - Developed integration layers (REST APIs) to interconnect customs systems with accounting and administrative platforms (ASPEL SAE, COI, NOI) for communication between systems, fulfilling 100% of the information exchange to be able to have daily system updates.
 - Consolidated the decision-making process through interactive dashboards in real time (Power BI, Grafana) for the monitoring of KPIs of the executive committee, fulfilling 100% for decision-making on the operation and release of resources.
 - Designed the operational governance and regulatory compliance framework aligned with international standards (ISO 27001, GDPR, HIPAA), achieving 90% progress in the areas to be aligned with the regulations and standards for its recognition.

- Led the massive data migration of the hospital system (HIS ISSEMYM), executing ETL processes to successfully transfer more than 100 million clinical records to 28 modules and delivering 100% of the project scope for the first phase of implementation in the hospital.
- Coordinated the design of microservices (Java / Angular) and interfaces under the HL7 standard for interoperability between pharmacy, laboratories and image banks, reaching 80% of the implementations with the other areas and providers for delivery within the hospital system.
- Executed the critical infrastructure migration from Oracle 11g (Linux) to Microsoft SQL Server 2019, Windows Server 2019, achieving 100% data loss during the migration.
- Maximized the availability of mission-critical servers through performance optimization and automated infrastructure monitoring.

Mexican Center for Philanthropy AC (CEMEFI) | Systems Director / IT Coordinator |

March/2003 – October/2021

- Modernized the ESR (Socially Responsible Company) System in .NET and SQL Server, digitizing the application and ruling at the national level, currently functioning at 100% in this year 2026.
- Developed the scalable platform of the Directory of Philanthropic Institutions for more than 2,800 civil society organizations, improving project coordination and achieving 90% system improvements.
- We develop collaboration strategies between suppliers, reducing costs for the organization by saving 40% of initial costs through improvement agreements between both parties.
- Managed the global corporate infrastructure in hybrid environments (Windows Server, SQL/MySQL, IP networks and Cisco/Avaya telephony) having 100% operation of all systems in operation.
- Managed and optimized a network of more than 50 web portals based on enterprise CMS (WordPress, Joomla, Drupal) for high concurrency support.

EDUCATION

National Polytechnic Institute (IPN) - UPIICSA Bachelor of Science in Information Technology Year of graduation: 2001.

CERTIFICATIONS AND COURSES

Official Certifications:

- PostgreSQL Database Administration, 2025.
- Microsoft Azure Fundamentals AZ-900, 2026.
- ClickHouse DB Professional.
- Microsoft Dynamics CRM, SharePoint and Exchange Server.
- Windows Server Administration and SQL Server Management.

Technical Courses and

Specializations: - Development, Configuration and Implementation on Odoo ERP.

- Container Architecture and DevOps (Kubernetes & Docker).
- Administration of Red Hat Enterprise Linux Systems & Cisco Security.
- Advanced Analytics and Data Visualization (Power BI & Grafana).
- Integration of Tools and Applied Artificial Intelligence (LLM, ML, NLP).
- Administration of Web Infrastructure and Enterprise CMS.

LANGUAGES

- Spanish: Native.
- English: B2 (Upper-Intermediate) - Technical reading, writing and business speaking.
