

Rubén Miguel Martínez

Software Architect / Implementations Manager

México City, Iztacalco | Tel. +52 56 53 52 71 39 | Email: rubenmiguelmartinez@hotmail.com

Professional Summary

Computer Science Engineer (IPN - UPIICSA) with over 20 years of experience leading software architecture, advanced database management, and implementation of critical corporate systems (ERP/CRM). Specialist in massive data migration, microservices design, complex API integrations, and the deployment of real-time business analytics dashboards. Proven expertise in optimizing Cloud and On-Premises infrastructure costs, managing security compliance under ISO 27001 standards, and leading multidisciplinary technical teams under agile methodologies.

Skills

- **Architecture & Methodologies:** Solution Architecture, Microservices, API Integration, Agile Methodologies, Regulatory Compliance (ISO 27001, GDPR, HIPAA).
- **Databases:** PostgreSQL, MS SQL Server (2019-2025), Oracle 11g, MySQL, ClickHouse, MongoDB, MariaDB, DBeaver.
- **Cloud & DevOps:** Microsoft Azure, Amazon AWS, Google Cloud Platform (GCP), Docker, Kubernetes, Git, Linux (Red Hat/Ubuntu/CentOS).
- **Business Systems:** ERP Odoo, SAP, Microsoft Dynamics CRM, Salesforce, Oracle Netsuite, ASPEL (SAE/COI/NOI).
- **Monitoring & BI:** Power BI, Grafana, Real-time Dashboards, Crystal Reports, Jasper Reports, Tableau, Superset.

Professional Experience

Implementation Manager / Software Architect

Himex Customs Agency June 2024 – May 2026

- Led the strategic engineering and deployment of the customs ERP ecosystem over the Odoo platform, achieving end-to-end automation of operational workflows and eliminating critical manual processes.
- Designed and configured distributed relational database architectures (PostgreSQL, SQL Server, Oracle, MySQL), ensuring High Availability (HA) schemas, referential integrity, and a licensing restructuring that minimized hardware expenditures.
- Developed data integration layers by designing, documenting, and consuming robust APIs to interconnect core customs software with key financial and accounting suites (ASPEL SAE, COI, NOI).
- Deployed a centralized analytical architecture through interactive dashboards (Power BI, Grafana) that consolidated data silos, delivering real-time Key Performance Indicators (KPIs) to drive C-level board decisions.
- Designed the IT governance framework aligned with international ISO 27001, GDPR, and HIPAA standards, drastically mitigating security risks and data protection vulnerabilities.

TUTUM TECH | Software Architect / Systems Administrator | December 2021 – May 2024

- Directed the critical data migration strategy for the healthcare system (HIS ISSEMYM Toluca), executing precise Extraction, Transformation, and Loading (ETL) of over 100,000,000 historical medical records across 28 active medical modules.
- Coordinated the architectural design of microservices (Java / Angular) and clinical interface engines under the HL7 international standard, guaranteeing seamless messaging exchange between pharmacy, laboratory, and PACS imaging systems.
- Planned and executed enterprise database infrastructure migration from legacy Oracle 11g instances on Linux (Ubuntu/Red Hat) environments to Microsoft SQL Server 2019 Standard and Windows Server 2019, securing zero data loss.
- Supervised the full lifecycle of provisioning, installing, and performance tuning for mission-critical database servers, deploying end-to-end telemetry and automated infrastructure health checks.
- Designed and launched the centralized IT service desk for incident management and troubleshooting across the hospital environment, establishing strict SLAs and Disaster Recovery Plans (DRP) to safeguard business continuity.

-Directed the full software development lifecycle (SDLC) and modernization of the ESR (Socially Responsible Enterprise) national portal for 18 years using Visual Studio .NET and SQL Server, digitizing the corporate application and evaluation workflows for automated scoring nationwide.

-Coordinated the development of the Philanthropic Institutions Directory architecture, consolidating a highly scalable platform for search, networking, and strategic resource matching for over 2,800 civil society organizations.

-Designed the global corporate IT infrastructure, managing on-premises physical and virtual environments under Windows Server, SQL Server/MySQL database instances, IP routing, Cisco/Avaya telephony, and biometric perimeter access security.

-Planned and executed the cloud transformation strategy, migrating local email and collaboration suites to Microsoft Azure and Office 365 with Exchange Server cloud instances, improving institutional resilience and uptime.

-Led the development, governance, and hosting of a web network containing over 50 institutional sites based on enterprise CMS platforms (WordPress, Joomla, Drupal) interconnected with backend databases for high-concurrency public queries.

Education

National Polytechnic Institute (IPN) - UPIICSA

Bachelor of Science in Computer Science

CERTIFICATIONS, COURSES, AND TECHNICAL UPDATES

- Official Certifications: Microsoft Azure Fundamentals AZ900, ClickHouse DB Professional, PostgreSQL Database Administration, Windows Server Administration, SQL Server Management, Microsoft Dynamics CRM, Microsoft SharePoint, Microsoft Exchange Server.
- **Specialization & Artificial Intelligence (2023 - 2025):** Applied Artificial Intelligence, Kubernetes Containers DevOps, Docker Virtualization, Linux Red Hat Enterprise, Microsoft Power BI Advanced, Dashboard for Grafana, Firewall Cisco & Network Security, DBeaver Enterprise, Language Python y JavaScript.
- **Management Systems & Infrastructure:** Odoo ERP Consultant and Developer (POS, Inventory, Invoicing); Specialist in Microsoft Dynamics 365 CRM, Salesforce (Sales & Marketing Cloud), and Oracle NetSuite.
- **Artificial intelligence:** Google Gemini, Microsoft Copilot, Claude, ChatGPT, Machine learning (Machine Learning), Natural Language Processing (NLP), Neural networks.
- **Cloud computing:** digital transformation, data analysis, project management.
- **Programming:** Python, ClickHouse, Angular, Docker, Git, API development and API consumption.
- **Infrastructure:** Servers Windows Server, Serves Linux (Red Hat, Open Suse, Ubuntu, CentOS).
- **Server Administrator:** Hosting, Domains, Cloud, WordPress, Joomla, Drupal, Infrastructure, Storage Administrator (NAS).

LENGUAJES

- **Spanish: Native.**
- **English: Intermediate (Technical reading, writing, and business conversation).**
