

Rubén Miguel Martínez

Software Architect / Implementation Manager

Mexico City, Iztacalco | Tel. +52 56 53 52 71 39 | Email: rubenmiguelmartinez@hotmail.com

PROFESSIONAL SUMMARY

IT Director and Software Architect with over 20 years of experience leading technology strategy, systems architecture, and the implementation of critical enterprise platforms (ERP/CRM). Specialist in large-scale data migration, microservices design, and complex integrations via robust APIs. Proven track record in infrastructure cost optimization (Cloud/On-Premise), information security governance (ISO 27001), and leading multidisciplinary teams using agile methodologies.

SKILLS

- **Architecture & Methodologies:** Solution Architecture, Microservices, API Integration, Agile Methodologies, Regulatory Compliance (ISO 27001, GDPR, HIPAA).
- **Databases:** PostgreSQL, MS SQL Server (2019-2025), Oracle 11g, MySQL, ClickHouse, MongoDB, MariaDB, DBeaver.
- **Cloud & DevOps:** Microsoft Azure, Amazon AWS, Google Cloud Platform (GCP), Docker, Kubernetes, Git, Linux (Red Hat/Ubuntu/CentOS).
- **Business Systems:** ERP Odoo, SAP, Microsoft Dynamics CRM, Salesforce, Oracle Netsuite, ASPEL (SAE/COI/NOI).
- **Monitoring & BI:** Power BI, Grafana, Real-Time Dashboards, Crystal Reports, Jasper Reports, Tableau, Superset.

PROFESSIONAL EXPERIENCE

Himex Customs Agency | *Implementation Manager / Software Architect* | June 2024 – May 2026

- **It automated the entire operational flow** through the strategic engineering and deployment of the Odoo ERP, completely eliminating the agency's critical manual processes.
- **He designed and implemented distributed database architectures** (PostgreSQL, SQL Server, Oracle, MySQL) in High Availability (HA), restructuring the licensing scheme to optimize hardware costs.
- **He developed robust integration layers (APIs)** to securely interconnect native customs systems with key accounting and administrative platforms (ASPEL SAE, COI, NOI).
- **It consolidated management information silos** by deploying interactive real-time dashboards (Power BI, Grafana), streamlining KPI monitoring for the executive committee.
- **It reduced the technological vulnerability surface** by designing an operational governance framework aligned with international standards ISO 27001, GDPR and HIPAA.

TUTUM TECH | *Software Architect / Systems Administrator* | December 2021 – May 2024

- **He led the massive migration of data** from the hospital system (HIS ISSEMYM), executing ETL processes to successfully transfer more than 100 million clinical records to 28 active medical modules.
- **It ensured clinical interoperability** by coordinating the design of microservices (Java / Angular) and interfaces under the international standard HL7 for communication with pharmacies, laboratories and image banks.
- **He executed the critical infrastructure migration** from Oracle 11g (Linux) environments to Microsoft SQL Server 2019 and Windows Server 2019 architectures, ensuring zero data loss.
- **It maximized the availability of mission-critical servers through performance tuning** tasks and the implementation of telemetry and automated infrastructure monitoring.
- **He established the centralized service desk** for incident management under strict SLAs and designed Disaster Recovery Plans (DRPs) to ensure business continuity.

Mexican Center for Philanthropy AC (CEMEFI) | Systems Director / IT Coordinator | March 2003 – October 2021

- **He modernized the ESR (Socially Responsible Company) System** in .NET and SQL Server, digitizing the application and evaluation model to automate the delivery of results at the national level.
- **He developed the scalable platform** of the Directory of Philanthropic Institutions, facilitating the search and linking of strategic resources for more than 2,800 civil society organizations.
- **He designed and managed the global** corporate infrastructure, managing hybrid (physical and virtual) environments on Windows Server, SQL/MySQL databases, IP networks and Cisco/Avaya telephony.
- **It increased the resilience of institutional email** by leading the transition from local services to Cloud schemes with Microsoft Azure, Office 365 and Exchange Server.
- **He managed and maintained a network of more than 50 web portals** based on enterprise CMS (WordPress, Joomla, Drupal), optimizing them to support high-concurrency dynamic queries.

TRAINING

National Polytechnic Institute (IPN) - UPIICSA Bachelor's Degree in Computer Science

CERTIFICATIONS, COURSES AND TECHNICAL UPDATES

- **Official Certifications:** Microsoft Azure Fundamentals AZ900, ClickHouse DB Professional, PostgreSQL Database Administration, Windows Server Administration, SQL Server Management, Microsoft Dynamics CRM, Microsoft SharePoint, Microsoft Exchange Server.
- **Specialization Courses (2023 - 2025):** Applied Artificial Intelligence, Kubernetes Containers DevOps, Docker Virtualization, Linux Red Hat Enterprise, Advanced Microsoft Power BI, Dashboarding with Grafana, Cisco Firewall & Network Security, DBeaver Enterprise, Python and JavaScript Language.
- **Business Management Systems:** Consultant and Developer in ERP Odoo (POS, Inventory, Billing), Specialist in CRM Microsoft Dynamics 365, Salesforce (Sales & Marketing Cloud) and Oracle Netsuite.
- **Artificial Intelligence:** Google Gemini, Microsoft Copilot, Claude, ChatGPT, Machine Learning, Natural Language Processing (NLP), Neural Networks.
- **Cloud computing:** digital transformation, data analysis, project management.
- **Programming:** Python, ClickHouse, Angular, Docker, Git, API development and consumption.
- **Infrastructure:** Windows Servers, Linux Servers (Red Hat, Open Suse, Ubuntu, CentOS).
- **Server Administrator:** Hosting, Domains, Cloud, WordPress, Joomla, Drupal, Infrastructure, Storage Administrator (NAS).

LANGUAGES

- **Spanish:** Native.
- **English:** Intermediate (Technical reading, writing and business conversation).
